

## **Danger Signs in Pregnancy**

**Call your midwife NOW if you have any of the following:**

- **bleeding from your vagina**
- **sharp pains in your stomach or severe cramps**
- **fluid leaking or gushing from your vagina**
- **a headache that won't go away**
- **severe upset stomach or constant vomiting**
- **blurry eyesight, seeing flashes or spots of light**
- **severe swelling**
- **feeling faint or dizzy**
- **chills and fever over 100 degrees**
- **you don't feel your baby move in 10-12 hours**
- **burning or pain when you urinate**

**Your midwife is a phone call away, please call if you have any pressing concerns or worries.**
